Technical Profile: Full Stack Engineer

Frontend Excellence

Frameworks: React (Hooks/Context API), Next.js, or Vue.
State Management: Redux Toolkit, TanStack Query (React Query), or Zustand.
UX/UI: Ability to translate Figma mocks into pixel-perfect, accessible (A11y) code.

Backend & DevOps

Environments: Node.js (Runtime) or Python; experience with Serverless (Vercel/AWS Lambda).
Data: PostgreSQL (Relational) and Redis (Caching); Prisma or Drizzle ORM.
Infrastructure: Docker basics and experience with cloud monitoring (Datadog/Sentry).

The "Glue" (Soft Skills)

Product Mindset: You don't just build what's on the ticket; you think about the user.
Collaboration: Comfortable bridging the gap between Design and DevOps.
Pragmatism: Ability to balance "perfect code" with "shipping on time."
