Job Description for Python Developer

What You'll Do (Responsibilities)	What You'll Need (Requirements)	What You'll Get (Benefits)
Backend Architecture: Build and maintain scalable APIs using FastAPI or Django.	**Python Mastery:** 3+ years of professional experience with Python (AsyncIO, Type Hinting).	**Compensation:** $130k – $175k + Performance-based bonuses.
Database Design: Optimize PostgreSQL queries and manage Redis caching layers.	**System Design:** Solid understanding of Microservices and RESTful API patterns.	**Time Off:** Unlimited PTO with a "minimum 3-week" mandatory policy.
Testing & CI/CD: Maintain 90%+ test coverage and manage GitHub Action workflows.	**DevOps Basics:** Familiarity with Docker, Kubernetes, and AWS deployment.	**Perks:** Weekly catered lunches (or meal stipends) and a flexible hybrid schedule.
